TECHNICAL SKILLS

- Python.
- Strong statistical background.
- Data handling and visualization in R, including plotly and shiny applications.
- Creating dynamic reports and websites in Quarto.
- Proficiency in SQL.
- Git and GitHub.
- PowerBI and Tableau.
- Advanced Excel and VBA.

RELEVANT COURSEWORK

- Advanced data visualization (A)
- Bayesian statistics (A-)
- Theory of statistics (A-)
- Big data management for data science
- Computational machine learning
- Statistical modeling and inference

EXAMS / CERTIFICATIONS

- Exam P: SOA
- Exam FM: SOA
- MAS 1 Exam: CAS
- Exam 5 (ratemaking): CAS
- Base SAS Certified

LANGUAGES

- Native English
- Upper Intermediate Spanish

PROFESSIONAL SUMMARY

- Master's student in data science with professional experience applying statistical analysis, data management, and visualization to real-world problems. Experienced with Python, R, SQL, Power BI, and Excel, with a background spanning industry analytics and higher education. Strong communicator able to translate complex data and statistical concepts for non-technical audiences.

WORK EXPERIENCE

ASSISTANT ACTUARY

Stillwater Insurance Group

May 2024 - July 2026

- Developed and maintained a large-scale Excel rating tool used to calculate premiums for current policies, integrating new coverages and rating features while maintaining data flows and complex calculation logic across interconnected workbooks. This included developing documentation and standardized data workflows for previously undocumented pricing processes.
- Performed spatial analysis of insurance exposure, calculating geographic distances between policies to identify areas of concentrated risk.
- Designed and implemented a SQL/R data pipeline and database containing historical policy records and claim transactions to evaluate the performance of existing underwriting tier factors. This utilized R to transform, trend, and develop historical claims data for actuarial analyses and pricing decisions.
- Conducted ad hoc statistical analyses of loss ratios identifying differences in loss experience across risk segments.

ASSITANT LECTURER

Ball State University

Aug 2022 - May 2024

- Designed and developed an asynchronous data analytics and visualization course from scratch, creating all instructional materials, assignments, and video content. Taught an end-to-end workflow spanning data manipulation and visualization in Excel, Tableau, and R, including the Tidyverse, Plotly, and Shiny. [\[Data visualization course website\]](#).
- Taught a two-semester sequence in calculus-based probability and statistics, developing all lecture materials, guided notes, and assignments to prepare students for Society of Actuaries Exam P.
- Led students through quantitative reasoning course, translating financial, probability, and statistical concepts into applied, accessible instruction.

EDUCATION

Barcelona School of Economics

Sept 2026 - Present

Master of Data Science Methodology

Miami University

Aug 2018 - May 2020

Master of Science in Statistics

Northern Kentucky University

Aug 2015 - May 2018

Bachelor of Science in Mathematics & Statistics

RESEARCH AND PRESENTATIONS

"Data Exploration and Visualization" at Women in Data Science (WiDS) Conference Muncie @ Ball State University 2024

- coltongearhart.quarto.pub/wids-data-viz

Master's Project: Sample size requirements for fitting multiple regression models

- coltongearhart.quarto.pub/masters-project
